

New Comfort Experience

The completely redesigned interface will ensure the right level of comfort for any home and provide powerful flexibility that will maximize energy efficiency. All-new presets provide personalized comfort settings that can be recalled on a schedule or with a couple of taps on a touch screen or in the Control4 App. Imagine, a climate control system that responds to the dynamic changes of daily life, instead of being bound to a rigid time-based schedule.

Precision, reliability, & flexibility

- Adjust the temperature in thermostat mode
- Manage heating and cooling set-points
- Adjust fan speed
- Control humidity levels (with a connected humidity system)

Works seamlessly around the world

Now you can use this beautiful new comfort experience with common household systems and popular brands throughout the world, including radiant flooring, forced air, dual fuel, and geothermal systems provided by your favorite brands.
