

Making the Move: New Smart & Beautiful Lighting

Migrating to Next-generation Wireless Lighting 120V

Featuring a new elegant design, custom-back-lit engraving, ambient light sensors, and available in a broad range of colors and finishes, Control4 Next-generation Lighting products deliver smart and beautiful lighting solutions for the most sophisticated customer. For customers evaluating Control4 lighting quotes from dealers check out the differences between our "old" and "new" solutions.

Legacy lighting products (120V)

Wireless Dimmer (C4-DIM1-Z)

Wireless ELV Dimmer (C4-TDIM1-Z)

Wireless Switch (C4-SW2-Z)

Next-generation wireless lighting products (120V)

Forward Phase Dimmer (C4-FPD120)

An economical solution for dimming forward phase compatible loads, including incandescents, line-voltage halogens, and magnetic transformers, the Forward Phase Dimmer is also great for dimming high-wattage loads such as chandeliers and large banks of recessed lights. It is compatible with forward phase dimmable LEDs, CFLs, and fluorescents.

Adaptive Phase Dimmer (C4-APD120)

This elegant dimmer is compatible with a broad range of dimmable load types including most LEDs, incandescents, halogens, electronic low voltage (solid state) transformers, magnetic (iron core) low voltage transformers, fluorescents, and compact fluorescents.

Switch (C4-SW120277)

Get on/off control for virtually every type of load, including LED lights, incandescents, halogens, electronic low voltage (solid state) transformers, magnetic (iron core) low voltage transformers, fluorescents, compact fluorescents, and motors, including ceiling fans and bathroom ventilation fans. The Wireless Switch also handles high in-rush loads such as fountain pumps or large banks of fluorescent lights and can be used to switch wall outlets.

Making the Move: New Smart & Beautiful Lighting

Legacy lighting products (120V)

Wireless 2-Button Keypad (C4-KP2-Z)

Wireless 3-Button Keypad (C4-KP3-Z)

Wireless 6-Button Keypad (C4-KP6-Z)

Next-generation wireless lighting products (120V)

Auxiliary Keypad (C4-KA)

This economical solution for three-way control of a load uses existing in-wall three-way wiring to wire directly to any compatible Control4 Dimmer, Switch, or Fan-Speed Controller.

Configurable Keypad (C4-KC120277)

An elegant and customizable user interface that unlocks the power of one touch automation, enabling control of lighting, plus control of audio, video, security and more, this fully customizable keypad can be configured with two to seven custom-engraved, LED backlit buttons, using four different button sizes, for a total of 37 possible configurations.

Configurable Keypad (C4-KC120277)

An elegant and customizable user interface that unlocks the power of one touch automation, enabling control of lighting, plus control of audio, video, security and more, this fully customizable keypad can be configured with two to seven custom-engraved, LED backlit buttons, using four different button sizes, for a total of 37 possible configurations.

Next-generation colors and finishes

Gloss - White, Black, Light Almond, Ivory and Brown.

Satin - Snow White, Aluminum, Biscuit and Midnight Black.

Making the Move: New Smart & Beautiful Lighting

Migrating to Next-generation Wireless Lighting 240V

Featuring a new elegant design, custom-back-lit engraving, ambient light sensors, and available in a broad range of colors and finishes, Control4 Next-generation Lighting products deliver smart and beautiful lighting solutions for the most sophisticated customer. For customers evaluating Control4 lighting quotes from dealers check out the differences between our "old" and "new" solutions.

Legacy lighting products (240V)

Wireless Dimmer (LDZ-101-240)

Wireless ELV Dimmer (C4-TDIM2-Z)

Wireless Switch (LSZ-101-240)

Next-generation wireless lighting products (240V)

Adaptive Phase Dimmer (C4-APD240)

This elegant dimmer is compatible with a broad range of dimmable load types including most LEDs, incandescents, halogens, electronic low voltage (solid state) transformers, magnetic (iron core) low voltage transformers, fluorescents, and compact fluorescents.
