Control4 System Remote Control SR-250 (Model C4-SR250S-A-B) is intended for use in a Control4® system with OS 2.0 and later. It is included with the purchase of select Control4® controllers, but may be purchased separately. This System Remote Control can be used to:

- Navigate system menus and access media databases on a television or monitor
- Navigate system menus and access media databases in its own display window
- Control system devices

This System Remote Control goes beyond a typical “universal” remote that simply learns IR codes from TVs, VCRs, CD players, and DVD players. This device features:

- Bi-directional communication with system components
- 2.4GHz wireless mesh networking
- Full access to system components
- Backlighting on keys and display for ease of use in dark rooms
- Ambient light sensor for efficient control of backlighting
- Quick-access buttons to select recently used audio and video devices
- Programmable buttons
- Paging functionality
- Standard control features for: Digital Satellite Systems (DSS), cable boxes, TV tuners, Digital Video Recorders (DVR), DVD changers/players, CD changers/players, MTS players, VCRs, or TVs.
- Powered by four (4) AA batteries (included)

**ATTENTION!** For empfänger court-circuit, fuite ou rupture de batterie.
Utilisez les accumulateurs alcalins typiques d’A.A. seulement.
- Ne mélangiez pas les types de batteries, tels que les batteries alcalines et rechargeables de NiMH.
- N’essayez pas de recharger une batterie à moins que la batterie soit spécifiquement marquée « rechargeable ».
- Ne vous débarrassez jamais des batteries dans un feu.

**NE VERWENDEN!** Batterien nicht in Feuer werfen. Batterie nicht in Abfall werfen.

**NEVER DISPOSE OF BATTERIES IN A FIRE.**

**Battery Level** in the Device Events pane.

**Bi-directional communication with system components**

**Program these buttons using the AV device properties page.**

**Program the Programmable Buttons (Red, Green, Yellow, Blue, *, or #) either based on the selected AV device or the selected room (Figure 4).**

**Program the System Remote Control Paging**

You can configure the Beep paging feature on the SR-250 through programming to page the remote if it’s misplaced. Program a keypad or custom button to cause the remote to beep when the keypad button pressed.

To program the paging feature for the remote:

1. Start Composer Pro and connect to a Director.
2. Select the Programming view.
3. Select the Event that you want to use to start the page. For example, select a keypad button press; first select the keypad under the Device Event section (on the left), and then select the button under Events.
4. In the Actions list (on the right), select **System Remote Control SR-250** in the Commands list, choose an action for the **System Remote Control**, and then double-click the green arrow to add the action to the Script pane (Figure 5).

---

**Program the Programmable Buttons**

On the System Remote Control SR-250, you can program six (6) soft buttons (Red, Green, Yellow, Blue, *, and #) to perform specific activities, for example, to execute any of the AV device’s macros or IR codes.

Program these buttons using the AV device properties page.

**Configuration of the Programmable Buttons (Red, Green, Yellow, Blue, *, or #) either based on the selected AV device or the room (Figure 4).**

**Program the Programmable Buttons (Red, Green, Yellow, Blue, *, or #) either based on the selected AV device or the selected room (Figure 4).**

**Battery Use and Care Tips**

- When prompted to do so, press the red button four (4) times to identify the Gateway.
- In the Connections view, click the Channel button four (4) times to identify the Gateway.
- In the window, click Close.
- Choose a percentage from 0 (Off) to 100 (full brightness).
- Check or change the ZigBee Channel. If you need to change the ZigBee channel for the Controller.
- Press the List button, and then select **Info** | **Config**.
- From the drop-down list, choose **Subtitle**.
- Choose the **Set** button to create a Subtitle button.

**Battery Replacement Safety Rules**

**WARNING!** To prevent a battery short, leakage or rupture:

- Use typical AA Alkaline batteries only.
- Do not mix battery types, such as Alkaline and rechargeable NiMH batteries.
- Never attempt to recharge a battery unless the battery is specifically marked “ rechargeable.”
- Never dispose of batteries in a fire.

**NOTE:** To complete the identification process, the SR-250 must be on reception), do the following at the SR-250:

1. Restart Composer Pro and connect to a Director.
2. Ensure that the System Design view is selected.
3. Ensure that you have the following devices in your project:
   - Gateway
   - System Remote Control SR-250
   - An AV device to be controlled
4. Select the **Select** button view.
5. On the Network tab, ensure the controller and the SR-250 are both identified (have a network address).

**Program the Programmable Buttons**

- Display Brightness—Set the light level (brightness) of the screen backlight.
- Keypad Brightness—Set the light level (brightness) of the keypad backlight.
- Sleep Mode—Set how long the System Remote Control stays awake after no activity. The default setting is 15 seconds, but can be extended up to 60 seconds or can be reduced down to 0 to conserve battery life.
- Battery Level—Display the current strength of the batteries.
- Channel—Display the ZigBee channel set for the SR-250, which should match the ZigBee channel for the Controller.
- Firmware Version—Displays the current firmware version.
6. Press the List button, and then select **Info** | **Config**.
7. From the drop-down list, choose **Subtitle**.
8. Choose the **Set** button to create a Subtitle button.

**Battery Use and Care Tips**

- When prompted to do so, press the red button four (4) times to identify the Gateway.
- In the Connections view, click the Channel button four (4) times to identify the Gateway.
- In the window, click Close.
- Choose a percentage from 0 (Off) to 100 (full brightness).
- Check or change the ZigBee Channel. If you need to change the ZigBee channel for the Controller.
- Press the List button, and then select **Info** | **Config**.
- From the drop-down list, choose **Subtitle**.
- Choose the **Set** button to create a Subtitle button.

**Battery Replacement Safety Rules**

**WARNING!** To prevent a battery short, leakage or rupture:

- Use typical AA Alkaline batteries only.
- Do not mix battery types, such as Alkaline and rechargeable NiMH batteries.
- Never attempt to recharge a battery unless the battery is specifically marked “ rechargeable.”
- Never dispose of batteries in a fire.

**NOTE:** To complete the identification process, the SR-250 must be on reception), do the following at the SR-250:

1. Restart Composer Pro and connect to a Director.
2. Ensure that the System Design view is selected.
3. Ensure that you have the following devices in your project:
   - Gateway
   - System Remote Control SR-250
   - An AV device to be controlled
4. Select the **Select** button view.
5. On the Network tab, ensure the controller and the SR-250 are both identified (have a network address).

**Program the Programmable Buttons**

- Display Brightness—Set the light level (brightness) of the screen backlight.
- Keypad Brightness—Set the light level (brightness) of the keypad backlight.
- Sleep Mode—Set how long the System Remote Control stays awake after no activity. The default setting is 15 seconds, but can be extended up to 60 seconds or can be reduced down to 0 to conserve battery life.
- Battery Level—Display the current strength of the batteries.
- Channel—Display the ZigBee channel set for the SR-250, which should match the ZigBee channel for the Controller.
- Gateway—Display the MAC address of the Zigbee Server (usually your Controller unless you specify differently).
- MAC—Display the System Remote Control’s own MAC address.
- Firmware Version—Display the current firmware version.
6. Press the List button, and then select **Info** | **Config**.
7. From the drop-down list, choose **Subtitle**.
8. Choose the **Set** button to create a Subtitle button.

**Battery Use and Care Tips**

- When prompted to do so, press the red button four (4) times to identify the Gateway.
- In the Connections view, click the Channel button four (4) times to identify the Gateway.
- In the window, click Close.
- Choose a percentage from 0 (Off) to 100 (full brightness).
- Check or change the ZigBee Channel. If you need to change the ZigBee channel to match the controller’s channel (sometimes changed to improve reception), do the following at the SR-250:
- Press the List button, and then select **Info** | **Config**.
- From the drop-down list, choose **Subtitle**.
- Choose the **Set** button to create a Subtitle button.

**Battery Replacement Safety Rules**

**WARNING!** To prevent a battery short, leakage or rupture:

- Use typical AA Alkaline batteries only.
- Do not mix battery types, such as Alkaline and rechargeable NiMH batteries.
- Never attempt to recharge a battery unless the battery is specifically marked “ rechargeable.”
- Never dispose of batteries in a fire.

**NOTE:** To complete the identification process, the SR-250 must be on reception), do the following at the SR-250:

1. Restart Composer Pro and connect to a Director.
2. Ensure that the System Design view is selected.
3. Ensure that you have the following devices in your project:
   - Gateway
   - System Remote Control SR-250
   - An AV device to be controlled

8. Choose the **Set** button to create a Subtitle button.

**Battery Use and Care Tips**

- When prompted to do so, press the red button four (4) times to identify the Gateway.
- In the Connections view, click the Channel button four (4) times to identify the Gateway.
- In the window, click Close.
Install and Maintain the Batteries
Install the Batteries
Install the four (4) AA batteries (included) into the back of the SR-250. Insert them according to the diagram provided in the battery compartment (with the + and - terminals aligned correctly).

Battery Use and Care Tips
• Keep the battery contacts and compartment clean.
• Remove the batteries from the product if it is not going to be used for several months.
• Extreme temperatures reduce battery performance. Avoid putting the SR-250 in very warm places.

Battery Replacement Safety Rules
! WARNING! Prevent a battery short, leakage or rupture:
• Use typical AA Alkaline batteries only.
• Do not mix battery types, such as Alkaline and rechargeable NiMH batteries.
• Never attempt to recharge a battery unless the battery is specifically marked “rechargeable.”
• Never dispose of batteries in a fire.

Program the Programmable Buttons
On the System Remote Control SR-250, you can program six (6) soft buttons (Red, Green, Yellow, Blue, *, and #) to perform specific activities, for example, to execute any of the AV device’s macros or IR codes.

Program these buttons using the AV device properties page.

1. Start Composer Pro and connect to a Director.
2. Select the System Design view.
3. Ensure that you have the following devices in your project:
   • Controller
   • System Remote Control SR-250
   • An AV device to be controlled
4. Select the Programming view.
5. On the Network tab, ensure the controller and the SR-250 are both identified (in that order) to get into Edit mode.
6. Choose or change the SR-250 properties as needed in the System Design view, project tree.
7. Select the System Remote Control SR-250 object to display the device’s properties (Figure 3).
8. Press the F4, F5, F6, F7, F8, and F9 buttons (or right-click and choose Macro) to program a desired command or IR code.
9. Select a keypad button press, first select the (4) Choose the button to create a Subtitle button.

Based on Room:
• Select the Room’s Properties page.

On the device’s Properties page, choose Code or Macro for the button you want to program. Choose a code or macro from the drop-down list, add the help text as needed, and then choose Set.

NOTE: Help text describes custom programming to users under the House option in any of the Navigators.

For example:
(1) In System Design view, select Disc Changer.
(2) Under a red button, choose Code.
(3) From the drop-down list, choose Subtitle.
(4) Choose the Set button to create a Subtitle button.

Program System Remote Control Paging
You can configure the Beep paging feature on the SR-250 through programming to page the remote if it’s misplaced. Program a keypad or custom button to cause the remote to beep when the keypad button pressed.

To program the paging feature for the remote:
1. Start Composer Pro and connect to a Director.
2. Select the Programming view.
3. Select the Event that you want to use to start the page. For example, select a keypad button press; first select the keypad under the Event Device section (on the left), and then select the button under Events.
4. In the Actions list (on the right), select System Remote Control SR-250.
5. In the Commands list, choose an action for the System Remote Control, and then double-click the green arrow to add the action to the Script pane (Figure 5).
Figure 5. Sample programming

- **Beep until button press**—The System Remote Control beeps until you press one of its buttons.
- **Beep for X seconds (<254)**—The System Remote Control beeps until X seconds have elapsed, or you press one of its buttons.
- **Stop Beep**—The System Remote Control stops beeping.
