Battery Replacement Safety Rules

CAUTION: To prevent battery shorting, leakage or rupture:
- Use AA Alkaline batteries only in the System Remote Control.
- Do not mix battery types, such as Alkaline and rechargeable NiMH batteries.
- Do not attempt to recharge a battery unless the battery is specifically marked "rechargeable.
- Never dispose of batteries in a fire.

Attention! Pour empêcher court-circuiter, fuite ou rupture du batterie :
- Utilisez les accumulateurs alcalins d ’ a l a seul dans le commutateur.
- Ne mélangez pas les types de batterie, tels que les batteries alcalines et rechargeables de NiMH.
- N’essayez pas de recharger une batterie à moins que la batterie soit spécifiquement marquée « rechargeable ».
- Ne vous débarrassez jamais des batteries dans un feu.

Vorsicht! Das Batterieaufladung, -durchsickern oder -abbruch verhindern:
- Benutzen Sie AA alkalische Batterien nur im Schalter.
- Wenden Sie sich nicht Batteriehersteller, wie alkalische und nachladbare NiMH Batterien.
- Versuchen Sie nicht, eine Batterie neu zu laden, es sei denn die Batterie ist spezifisch gekennzeichnet "nachladbare.
- Entledigen Sie sich Batterien in einem Feuer.

Use and Features
Control4 System Remote Control SR-250 (Model C4-SR250-2.8) is intended for use in a Control4® system. It is included with the purchase of select Control4® controllers, but may also be purchased separately. This System Remote Control can be used to:
- Navigate system menus and access media databases on a television or monitor.
- Navigate system menus and access media databases in its own display window.
- Control system devices.

This System Remote Control goes beyond a typical "universal" remote that simply learns IR codes from TVs, VCRs, CD players, and DVD players. This device features:
- Bi-directional communication with system components.
- ZigBee wireless mesh networking.
- Full access to system components.
- Back-lighting on keys and display for ease of use in dark rooms.
- Quick-access buttons to select recently used audio and video devices.
- Programmable buttons.
- Paging functionality.
- Standard control features for: Digital Satellite Systems (DSS), Cable Boxes, TV Tuners, Digital Video Recorders (DVRs), DVD Changers/Players, CD Changers/Players, MP3 Players, VCRs, or TVs.
- Powered by four AA batteries (included).

Install and Maintain Batteries
Install the four (4) AA batteries (included with the product) into the battery compartment (with the + and - terminals aligned correctly).

Battery Use and Care Tips
- Keep battery contacts and compartment clean.
- Remove batteries from the System Remote Control if it is not expected to be in use for several months.
- Extreme temperatures reduce battery performance. Avoid putting the System Remote Control in very warm places.

Use and Features
- Standard control features for: Digital Satellite Systems (DSS), Cable Boxes, TV Tuners, Digital Video Recorders (DVRs), DVD Changers/Players, CD Changers/Players, MP3 Players, VCRs, or TVs.
- Programmable buttons.
- Paging functionality.
- Full access to system components.
- Back-lighting on keys and display for ease of use in dark rooms.
- Quick-access buttons to select recently used audio and video devices.
- Bi-directional communication with system components.
- ZigBee wireless mesh networking.

Configure the Remote Control
1. Start Composer and connect to the Controller.
2. In the System Design view (selected by default), select the room where the System Remote Control will reside.
3. Under the My Drivers tab, locate the SR-250 under the User Interface section.

Double-click SR-250 to add the device to the project tree.

Identify the SR-250:
- In the Connections view, go to the Network tab.
- Select System Remote Control SR-250 in the center pane.
- Click Identify (or right-click and choose Identify).
- When prompted to do so, press the red 4 button four (4) times to have the device identify itself to the System Remote Control.

Note: To complete the identification process, the System Remote Control must be on the same ZigBee channel as the Controller; the Controller must have Znver enabled. If you need to change the ZigBee channel on the System Remote Control, see step 7.
- Once the MAC address appears in the window, click Close.

4. View or change the System Remote Control properties as needed in Composer. In the System Design view in the project tree, select the System Remote Control SR-250 object to display the device’s properties. The properties include:
- Screen Backlight — Set the light level (brightness) of the screen backlight. Choose a percentage from 0 (OFF) to 100 (full brightness).
- Keypad Backlight — Set the light level (brightness) of the keypad backlight. Choose a percentage from 0 (OFF) to 100 (full brightness).
- Sleep Mode — Set how long the System Remote Control stays awake after no activity. The default setting is 15 seconds, but can be extended up to 60 seconds or can be reduced down to 0 to conserve battery life.
- Battery Level — Displays the current strength of the batteries.
- Channel — Displays the ZigBee channel (1-14) for the SR-250, which should match the Zigbee channel set for the controller.
- MAC — Displays the MAC address of the Zigbee server (usually your Controller unless you specify differently).
- SR-250 — Displays the System Remote Control’s own MAC address.
- Firmware Version — Displays the current firmware version.

7. Check or change the ZigBee Channel:
- If you need to change the Zigbee channel to match the Controller’s channel (which is sometimes changed to improve reception), do the following at the SR-250:
- Press the List button once or twice to display menu options.
- Press buttons 2, 4, 6, 8, *, #, List (in that order) to get into Edit mode.
- Press the Up/Down arrows to change the ZigBee channel.
- Press List to exit Edit mode and save the changes.

Program the Programmable Buttons
On the System Remote Control Version SR-250, you can program six (6) soft buttons (Red, Green, Yellow, Blue, *, and #) to perform programmed activities. These buttons can be programmed to execute any of the AV device’s macros or IR codes. Program these options using the AV device properties page.

1. Start Composer and connect to a Director.
2. Ensure the System Design view is selected.
3. Ensure that you have the following devices in your project:
   - Controller
   - System Remote Control SR-250
4. An AV device to be controlled
5. Select Connections view.
6. On the Network tab, ensure the Controller and the System Remote Control are both network identified (have a network address).

Program the programmable buttons (Red, Green, Yellow, Blue, *, or #) either based on the selected AV device or the selected room.

Based on AV Device (pictured):
- Select the System Design view.
- Select an AV device to display the device’s Properties page.
- On the device’s Properties page, choose Code or Macro for the button you want to program, and then choose a code or macro from the drop-down list, edit the Help text as needed, and then choose Set.
- Note: Help text describes custom programming to end-users under the House option in any of the Navigators.

For example:
1. In System Design view, select Disc Changer.
2. Under Red button, choose Code. (3) From the drop-down list, choose Subtitle. (4) Choose the Set button to create a Subtitle button.

Programmed on Room (not pictured):
- Select the Programming view.
- Select a room in the Device Events pane.
- Select the Commands radio button in the [Room] Events pane.
- Use the drop-down menu to select a command or button (such as "Blue Button!").
- Build the script using items from the Actions pane to program the actions desired in the selected room when you select the command or button.
- For more information about programming, refer to the Composer Help file.

Program the System Remote Control Paging Feature
You can configure the Beep paging feature of this System Remote Control through programming. This feature can be used to page a lost System Remote Control. A keypad or custom button can be programmed to cause the System Remote Control to beep when pressed. This would allow the user to find the lost System Remote Control.

To program the paging feature for this System Remote Control:

1. Start Composer and connect to a Director.
2. Select the Programming view.
3. Select the Event that you want to use to start the page. For example, to select a keypad button press, first select the keypad under the Device Event section (on the left), and then select the button under Events.
4. In the Actions list (on the right), select System Remote Control SR-250.
5. In the Commands list, choose an action for the System Remote Control, and then double-click the green arrow to add the action to the script.
This device has a limited two (2) year warranty on parts from the date of purchase. Control4® will replace or repair any defective unit. Return unit to the place of purchase for replacement. For any damages incurred, the warranty will never exceed the purchase price of the device. This warranty does not cover installation, removal, or reinstatement cost. The warranty is not valid in cases where damage was incurred due to misuse, abuse, incorrect repair, or improper wiring or installation. It does not cover incidental or consequential damage. This warranty gives you specific legal rights, and you might also be entitled to other rights that vary from state to state. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages. In these cases, the above mentioned limitations might not apply to you. For complete warranty information, see http://www.control4.com/dealer/
