

Control4® OS 2.1

Soak up the joys of OS 2.1

This next generation of the OS 2.1 platform features enhanced home control functionality, support for exciting new hardware products, the 4Store application marketplace and design and usability improvements. And you'll always enjoy intuitive, elegant, high-quality, total home control at a great price.

Control4 OS 2.1 lets you control your home, your way. Interact with your Control4 system using your TV screen, Control4 remote, touch screens, your iPhone, iPad, tablet or PC, keypads, or the internet.

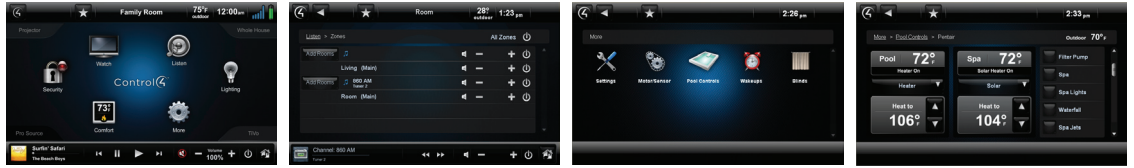

Enjoy new features

OS 2.1 lets you use programmable buttons to set lighting or music scenes, create playlists, and easily access and control your entire home from any touch screen, the TV screen...and even iPhones, iPads and PCs if you have a MyHome license. Some of the new features in OS 2.1 include:

- Custom Buttons—Easy one-touch access to your favorite scenes and functions, right from the home screen.
- Language Support—Enjoy control in almost 20 languages including: English, Czech, German, Spanish, French, Croatian, Italian, Korean, Polish, Portuguese, Russian, Slovak, Thai, Turkish, Ukrainian, Chinese (People's Republic of China), and Chinese (Taiwan)
- Photo Screen Saver—Your touch screens can showcase your favorite photos giving you digital picture frames throughout the house when you're not actively controlling your system.

Control4™

- Pool Control—Enjoy automated control of your pool temperature, covers and more with this easy interface.
- Thermostats—Create your preferences for the ideal temperature based on time of day, season or outdoor temperature, an event like a party, or your interest in energy savings.
- Audio Control—Manage your music your way in your rooms.

Why upgrade to OS 2.1?

If you're on an OS 2.x system, you'll find more of the features you want, more system stability and support for all of the new products from Control4 and our partners.

If you are still on a 1.x system, you're missing out on new features and products. OS 2.1 provides support for the slick in-wall touch screens with optional intercom capability, door locks, MyHome—the app that lets you control your home from your iPhone, iPad, PC or tablet, along with a host of next-generation Control4 and third-party products that only work on the new platform.

4Store application marketplace

4Store apps give you useful and fun features that enhance the functionality of both Control4 and third-party devices and systems in the home. Homeowners can set up a 4Store account online and then purchase and download 4Store applications. There are a variety of entertainment apps that you can download and enjoy through your touch screens and TVs. There are also control apps that provide enhanced system functionality for changing codes on locks, managing lighting scenes, or internet radio with support from a Dealer.

The Reviews Are In!

This is one of the best Control4 software releases to date. But don't just take our word for it!

"Passed the 'wife test'!"—Chris

"So far been very impressed C4! ...Great functionality and look forward to using it a lot in the future."—Eric

"Thus far, 2.1 has exceeded my expectations...feel confident that they will have a great C4 experience."—Chad
