

## The Tilted Kilt

With the goal of putting fun back into the traditional pub experience with an American twist, the Tilted Kilt located in Woodridge, Illinois, uses timeless design with a Celtic theme to give customers a memorable experience. To make the Tilted Kilt an entertainment knockout, owner Martin Bobak contacted local Control4 dealer Procom Enterprises.

### Traditional Décor + Cutting-Edge Technology

Guests entering the Tilted Kilt are greeted by beautiful stain-glass doors accented by traditional iron hardware. Other design touches include a bar and Captain's Table made of warm woods and designed for guest comfort. Guests also have the option of using any of the pool tables, dart boards and video games.

The attractive design only touches the surface of what really captures the eye at the Tilted Kilt. With 30 HDTVs scattered around the room, guests have multiple viewing options.

### Total Entertainment Solution

Through Control4, Procom has given Tilted Kilt the flexibility to deliver on-demand entertainment that will keep guests coming back for more. Procom configured the Control4 system to manage all of Tilted Kilt's audio and video using an HC500 and an HC300 Controller. Using either the SR250 remote or the 7-inch, in-wall touch screen, both the owner and employees can easily manage the system and deliver an unparalleled viewing experience for Tilted Kilt customers.

For video sources, the Tilted Kilt can move between eight HDTV DirecTV receivers or the installed Sony Blue-Ray player. Procom also integrated 24 speakers and four sub-woofers to create a building-wide sound system. For specific events, larger groups, or private parties, Tilted Kilt also has the option of lowering two 121-inch screens and playing back video via two Sony projectors.
