

## How Do You Engage Consumers in Energy Management?

### **Empower Consumers with Information**

Providing actionable information regarding energy use puts the consumer in charge. Tips on how to save, identifying devices that use more energy, and presenting the financial and environmental impact of their energy use, are just a few examples of how Control4 makes energy management relevant for people.

With the Control4 Energy Management System 100 (EMS100) consumers will be able to access this information nearly anywhere in the home – on the energy controller, a PC, a mobile phone or even the TV.

### **Create a Compelling User Experience**

The Control4 EMS 100 is designed to be at-a-glance useful, so the most compelling information is always available to users. It is also packed with fun applications and social elements that hook consumers to keep them engaged over time.

### **Deliver Advanced Home Automation & Control**

Only Control4 brings advanced automation and control to the home. Control4 technology is integrated into thousands of products from the world's leading consumer electronics brands, allowing consumers to control their home heating and cooling, and virtually every device in the home from the Control4 EMS 100.

Managing your home energy has never been easier.

# Introducing the Control4® Energy Management System 100

The Control4 Energy Management System 100 (EMS 100) brings a consumer-friendly approach to home energy management. The system has it all: an elegant energy controller, an easy to program thermostat, an engaging interface, fun applications, and a proven platform that ensures security and reliability. All combined, the Control4 EMS 100 delivers an unmatched consumer experience.

## The Control4® EC-100 Energy Controller

The EC-100 is an easy to use home energy controller that delivers actionable information about energy usage. Featuring a color touch-screen, an intuitive user interface, and lifestyle applications, the EC-100 empowers consumers to take a more active role in energy management.

The EC-100:

- Monitors and manages home energy use
- Provides detailed energy usage information per device in the home
- Projects billing information based on usage patterns
- Radically simplifies thermostat programming
- Automates and controls other devices in the home
- Features weather, clock, digital photos, traffic updates and more

## The Control4® WT-100 ZigBee Thermostat

The WT-100 is a non-power stealing wireless thermostat.

The WT-100:

- Offers pre-programmed or personalized schedule options
- Features four programmable time periods per day, with two temperature settings
- Includes a vacation mode, that users can set in advance and turn on just before leaving
- Has a large, easy-to-read digital display
- 2-3 year battery life
