Listen on Apple Music

APPLE MUSIC + CONTROL4:
LIFE IN PERFECT HARMONY

This Will Be Music to Your Ears

Apple Music®, the streaming service and application, is fully integrated and available to all Control4 customers with an active or new 4Sight® subscription.* You can add Apple Music using a Control4 Touchscreen or the Control4 app for Android or iOS.

Let's Make Beautiful Music Together

Customize your surroundings with personalized music scenes. Imagine starting your day with uplifting podcasts, being welcomed by your favorite songs, and unwinding with tailor-made Apple Music playlists for any occasion. The Control4 User Interface lets you adjust your listening experience, easily control playback—even from your Apple Watch®—and seamlessly discover new music.

Enjoy a seamless, ad-free music experience with:

- Curated playlists and Apple Podcasts®
- Collaborative and shared playlists
- Personal media libraries
- High-resolution audio playback at 192kHz and 24-bit depth
- Ultra-fine EQ controls and custom presets for your personalized taste
- Ability to easily manage every zone with intuitive, single-page controls
- Music controlled via Apple Watch and shared through home audio system
- Saved Favorited media from Apple Music's curated suggestions
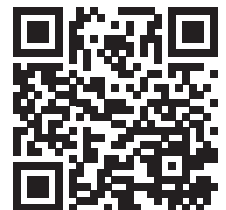

For 4Sight Users

Apple Music is available to 4Sight subscribers as part of our ever-expanding set of features and experiences made available through Control4. Your 4Sight subscription also enables the Control4 app for Android and iOS—including Apple Watch—with remote access, push notifications and alerts, Intercom Anywhere, integration with Alexa and Google Voice, and many other features.

Add Some Music to Your Day

To set up Apple Music on your Control4 system:

1. Using a touchscreen or the Control4 app, go to "Listen" and select "Manage Music."**

2. Tap on "Apple Music" and then tap "Add New."

3. If needed, rename the service. This can be helpful if you plan to integrate more than one Apple Music account.

4. Select the room or rooms where this Apple Music account should be accessible.
