Enhancements

1. Support for Chrome, Safari, and Edge browsers on both PCs and Macs without the need for plugins. Internet Explorer continues to use a plug-in.
2. Added SFTP support.
3. ONVIF enabled as default setting.
4. Added option in WEB UI to Enable/Disable Auto Focus (Default setting: Enable).
5. Added option in WEB UI to Enable/Disable Zoom/Focus Control (Default setting: Enable).
6. Added stream selection to snapshot capture.
7. Added support for smart motion triggers for control systems, including Control4.
8. Modified Digest authentication to Digest/Basic authentication.

Issues Resolved

1. Fixed issue where footage stored to SD card could be lost.

Known Issues

1. LumaLink connection method not supported in the Luma VMS for PC client software at this time.
