

SETTING UP THE MOIP CLIENT CONTROL APP

To enable the Client Control app for your customer, follow these simple steps:

1. Enable the Client Control App
2. Set up easy access to the end user app

Step 1 – Enable the Client Control app

Navigate and log in to the local interface of your MoIP controller with the local IP address or OvrC.

Click the **CONFIGURE** tab.

Click **Client Control App Settings**.

Toggle the **Enable Client Control** to on.

Step 2 – Set up easy access to the client control app

The actual app is a web page that functions like an app on your mobile device.

Navigate to **[IP address]/control** of your MoIP system on your clients' devices.

Select the menu button on your mobile device's browser. Select **Add To Home Screen**. You will now have an icon on the mobile devices home screen that looks just like app.

When your client is looking for a powerful media distribution solution but does not have a control system. Be confident that you can offer the MoIP Client Control app to give them the control they need.
