

IR MINI SUB

Triad's InRoom Mini Sub is our new subcompact powerhouse with an 8" driver, designed for venues where small size is important, but so is authoritative bass. Triad's new subwoofers offer the best in performance, value, and versatility, in a stunning new industrial design. With all new drivers, enclosures, and powerful, efficient amplifiers, there is a Triad subwoofer for any application.

New SubAmp technology combines Class AB performance and near-Class D efficiency with set-up and calibration features as recommended in CEA/CEDIA's new state-of-the-art defining document CEB-22 "Home Theater Recommended Practice: Audio Design". The RackAmp 350 provide simple "plug-and-play," and EZ set-up. You can have great performance right out of the box in nearly any room. Triad's new series of long-throw woofers provide greatly increased output and headroom over previous Triad subwoofers, but with low distortion and visceral impact. Custom paint matching and an infinite number of veneer finishes are available, because we build all our Subs one at a time in America, to your order.

 - Adjustable Off Delay
- Optimize multiple subs for best performance
 - Input Gain matches levels.
 - Delay time aligns subs together for better impact

Enclosure

Fully engineered, Premium MDF enclosure.

Acoustic Suspension.

Powered subwoofer.

Finishes

Triad's Basic, Real Wood Veneer & Custom Finishes are available for this product. The standard finish for this product is Black paint. For any other colors, please refer to Triad's Custom Match Finish program for this product. The paint we use is a top quality enamel and is applied with a light pebble finish. The veneer finishes are made from real wood and coated with an enamel clear coat.

Since all computer monitors and their colors vary, the digital color you see here will be different from the actual product finish.
