

CONTROL4® VIBRANT

FIXED COLOR EXTRUSION AND LENS

CONTROL4 VIBRANT FIXED COLOR IN-WALL EXTRUSION AND LENS (3-PACK) - 6.58FT (2M)

C4-LEEL3-IW-F-6F

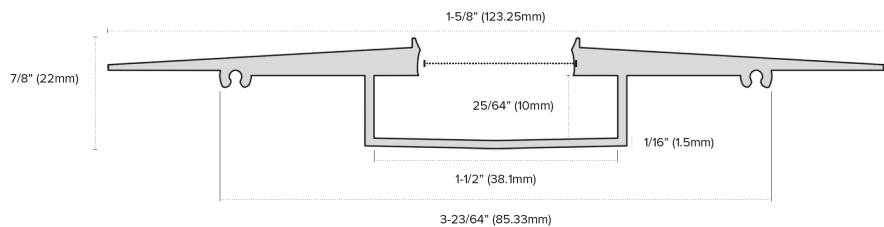

Use this extrusion for in-wall accent lighting to set the mood, change the ambiance, and provide general lighting. With its large flanges, this extrusion creates fewer seams, efficient installations, and is perfect for mud-in applications. Create a linear effect in the wall with fixed color, warm dimming, fully tunable, RGBW, or RGBTW linear lighting.

Note: To prevent spotting and provide a seamless line of light, it is recommended to install 10 mm LED tape on the side walls of the channel instead of the floor.

- LED tape light should be installed on side walls of the extrusion
- Designed for 1/2" drywall mud-in installation
- Frosted lens protects the light source while evenly diffusing light
- Lightweight anodized aluminum extrusion provides excellent heat dissipation
- Field cuttable extrusion and lens
- End caps available for a tailored look
- Compatible with 10-12 mm wide tape light (all indoor SKUs)
- Dimensions (H x W): 7/8" (22 mm) by 4-27/32" (12.825 mm) with an internal channel floor width of 1-1/2" (38 mm) and side wall height of 25/64" (10 mm)
